 Audits passed in 2012 and 2015

HISTORY AND MISSION

For more than fourteen years, ClinAssess has been in business. In addition to our years of experience in the market, you will find extensive professional expertise with us in all areas of clinical trial processing. In particular, we have special expertise in the indications of oncology, cardiovascular diseases, anti-infective and central nervous system diseases.

HIGHLIGHTS

Since 2012 associated member of the TMF (Technologie- und Methodenplattform für die vernetzte medizinische Forschung e.V.)

Our employees have years of experience in at least one of the well known therapeutic areas.

ClinAssess has already been involved in over 150 clinical studies with approx. 13,000 subjects included.

Management of an oncology network including investigators and trial sites for most oncological diseases.

SERVICES

Project Management

Our project management is the primary contact in relation to your study – for you and the trial sites. Our project managers coordinate all relevant and necessary project processes – in cooperation with you. All staff members have years of experience in clinical studies, profound knowledge of study planning, development and coordination of project processes and applicable regulatory requirements.

Medical Writing

In our department of medical writing, we have pooled our experts who support you with their medical training in creating study-specific documents.

Monitoring

We have been able to overcome many difficult situations so far because our Clinical Research Associates are trained and experienced in dealing with trial sites. Thus they contribute to the highest data quality and patient safety. With regular training of our Clinical Research Associates, we achieve the best possible support of your trial sites.

Data Management

Our motivated team comprises Data Managers experienced in various special fields in data management. This will ensure the highest level of data quality in each field of data management tasks, including both paper and electronic CRF. The close collaboration with the in-house departments of Project Management, Medical Writing, Monitoring and Biometrics also ensures efficient cleaning of your data.

Biometrics

In clinical research and also at ClinAssess, objectivity has top priority. In order to guarantee best possible conditions for clinical trials, ClinAssess has established its own biometrics department. Qualified staff will provide statistical consulting for the entire study process up to the evaluation of the results.
