HISTORY AND MISSION

OmniComm Systems is dedicated to helping the world's life sciences organizations and academic medical centres maximize the value of their clinical research investments. Through the use of innovative EDC technologies these organizations drive efficiency in clinical development, better manage their risks, ensure regulatory compliance and manage their clinical operations performance. OmniComm provides comprehensive solution with experience from over 4,000 clinical trials.

HIGHLIGHTS

Clinical Research:
 4,000+ studies worldwide involving more than 50,000 investigator sites in more than 55 countries.

Helpdesk:
 Site user support around the clock with full service multi-lingual support.

Industry standards:
 Interoperability with external systems to quickly and easily exchange data. Our current technology supports CDISC, SDTM, ODM, CDASH, HL7, E2B, and caBIG.

SERVICES

OmniComm is a global provider of eClinical software and services.

- ▷ Our comprehensive software and professional services, commitment to industry standards and an innovative approach to data integration using OmniConnect® Application Programming Interface (API), positions OmniComm as a leader in compliant data and information sharing. Our suite of products includes:
- ▷ **TrialMaster®** electronic data capture suite offers a compelling solution for electronic data capture with the most intuitive end-user experience, productive study design tool, flexible reporting, off-the-shelf integrations and convenient mechanisms for importing and exporting data.
- ▷ **TrialOne®** is the leading proactive eSource and Phase I site automation solution for early phase clinic operations. Whether it is volunteer recruitment, real-time study data collection, sample tracking, data management or reporting, TrialOne will handle all your Phase I study protocol needs. This web-based, tablet compatible system provides an advanced platform for automating your clinic operations and complies with FDA 21 CFR part 11 as well as supporting standards such as CDISC for easy import, export and reporting of data.
- ▷ **Promasys®** is an integrated clinical data management and electronic data capture system designed specifically for investigator initiated clinical studies. Built on a history of innovation spanning 25 years and utilized in over 1,000 clinical trials around the globe, Promasys continues to lead as the solution of choice. Promasys was developed by and with academic researchers to meet the unique demands and requirements of investigator initiated clinical studies. From study setup through database lock Promasys provides a comprehensive approach for data capture, data management and reporting.
- ▷ **Professional Services:** OmniComm's multi-disciplined team understands "it all starts with the customer". With more than 20 years of industry experience our staff understands your needs and can respond quickly to provide the right solution the first time. We listen to our customers and create an experience that addresses areas most critical to the success of clinical trial initiatives.
