 Audits passed in 2012 and 2015

HISTORY AND MISSION

emovis is proud to claim success in clinical investigating for the mutual benefit of both patients and the industry. In our dedicated professional staff, 6 Investigators and 8 Study Nurses are taking care of all necessary regulatory provisions, thus smoothing processes between patients, CROs and sponsors. If you are looking for an eligible audience of patients, recruited from Germany's biggest city Berlin, customized service – and reliable results, contact us for more information.

HIGHLIGHTS

emovis was founded 2001 by a group of clinical investigators.

Since 2005, we regularly amend our SOPs to ensure timeliness and accuracy.

Meanwhile, we successfully passed more than 20 Sponsor-Audits, including an FDA-Inspection in 2013 without issuing a Form 483.

We did clinical studies with up to 800 participants, all of which were recruited from our own advertising efforts. Our database lists roughly 11.000 patients interested in participating in new studies.

In 2009 we opened our sleep laboratory facilities, dedicated exclusively to clinical research.

Since 2012, we offer local home care services in line with the respective protocols for study participants all over German-speaking Europe, the UK and France.

SERVICES

- ▷ Specialized Investigator's Site in the heart of Berlin, Germany
- ▷ Reliable and immediate feasibility analyses
- ▷ Recruitment of compliant study participants/patients through dedicated tutoring
- ▷ Appropriate treatment in line with the study protocol
- ▷ Reliable Documentation
