HISTORY AND MISSION

acromion GmbH is a German headquartered, privately-owned, full-service, clinical CRO. Operating throughout Europe, we provide the full range of clinical research services for biotech, pharmaceutical, medical device and diagnostics companies. Founded in Germany in 2002, our company now offers more than a decade of successful clinical research across all stages of clinical drug development, starting at First-in-Man.

HIGHLIGHTS

The European Union has awarded EURE-CART (EUROpean Endeavour for Chimeric Antigen Receptor Therapies) with 5 Million Euro within the Horizon 2020 - Research and Innovation Framework Programme, section reserved to the new therapies for chronic diseases (including cancer).

To carry out this project and to reach clinical translation, a consortium of nine partners from five different EU countries has been established. acromion GmbH is one of these nine partners.

EURE-CART will bring together clinical experts in oncology, and pioneers and leaders in the field of cell and gene therapy for conducting a first-in-man Phase I/II clinical trial.

SERVICES
