HISTORY AND MISSION

Since our foundation in Dublin, Ireland in 1990, our mission has been to help our clients to accelerate the development of drugs and devices that save lives and improve quality of life. Currently, ICON operates from 77 locations in 38 countries and has over 12,500 employees. Our vision is to be the CRO partner of choice in drug and device development by delivering best in class information, solutions, and performance. More information is at www.iconplc.com.

HIGHLIGHTS

Today, ICON plc is a global provider of drug development solutions and services to the pharmaceutical, biotechnology and medical device industries supporting clinical development from compound selection to Phase I-IV clinical studies.

ICON is a trusted development partner for the world's largest pharmaceutical companies. 90% of the world's top 20 drugs have been developed with ICON's help.

Operating under strategic partnership models is one of ICON's strengths and the company has a number of major pharmaceutical companies amongst its strategic partners.

In addition ICON has a focus on **adaptive trial design**. For more than 15 years we have been involved in the development of the methodology for interim analyses and the planning and execution of adaptive clinical trials.

To date, ICON have planned and successfully conducted hundreds of adaptive clinical trials across all phases. As a result of our well-established procedures and our extensive experience, we manage to provide interim reports to DMCs/DSMBs within a few working days after database lock.
