HISTORY AND MISSION

PASSION. EFFICIENCY. QUALITY. That's our mission since 1994.
We performed more than 280 clinical studies phases I – IV, non-interventional studies, medical device studies as well as investigator initiated studies in over 25 therapeutic areas. Although our core competencies focus on clinical data management and biostatistics, many of these studies were performed as full-service together with our established partnerships.

HIGHLIGHTS

We are
a team of seasoned as well as tech-savvy professionals providing valuable data management solutions and biostatistical services to the industry. Our wealth of experience enables us to tailor solutions matching your project specific requirements with budget-consciousness and creativity.

Work with us
because we are good! We are known for forward thinking, high quality and on-time delivery. You might be surprised by the benefits of working with us. Here are some reasons:

Expertise | Passion | Versatility | Planning Certainty | Quality | Stable Budgets | Reliable Results
