History and Mission

MaganaMed GmbH is an eCRF provider founded in 2017 in Regensburg. We originally started by serving academic customers. Today, we mainly support small to mid-sized CROs, medical device and diagnostics manufacturers, academic institutions as well as small to mid-sized biotech and pharma companies. Our focus is on Europe, but we also serve some customers in the USA and Canada.

Highlights

Owner-managed company

- Long-term business orientation
- Personal customer support
- Strong focus on customer needs

Main focus

Small to mid-sized CROs, medical device and diagnostics companies

Compliance

Compliant with all relevant regulations like GCP, FDA 21CFR part 11, GDPR, etc.

Data security

Data stored with cutting edge encryption in ISO-27001 certified data centers

Services

Very intuitive EDC-system

Easy to use and minimal training requirement for the sites.

Web-based SaaS eSolution

- No installation required
- Works on every device
- Frequent automated backups

(De-)centralized data collection

- eCRF
- eCOA / ePRO, Surveys, eDiary
- Multi-lingual eCRFs

Participant management

- Dashboard for quick overviews
- Automated survey invitations

User management

- Role based permission system
- 2-factor authentication

Intuitive eCRF designer

- Drag&Drop eCRF designer
- Many field types pre-defined
- Programmable fields
- File upload (pictures, videos, ...)
- Real-time input validation
- Visibility rules
- And much more

Data export

- All study data available in standard format (CSV)
- Annotated CRFs (PDF)
- PDFs of filled CRF forms
- All metadata (queries, verifications, signatures, ...)

Monitoring

- Verifications, queries, notes
- Real-time data exploration
- Recruitment rate and study center performance

Biosample management

- Sample kit barcoding
- Sample life cycle tracking

Randomization

- List based randomization
- Simple, block, stratified randomization

Visit scheduler

- Define rules for visit windows
- Keep track of upcoming visits
- Automatically invite participants to remote visits (survey/ePRO/...)

API

- Connect your own app or device to our system
