## History and Mission

With over 30 years of full-service clinical trial expertise, **Alcedis** accompanies the entire research process, from the initial idea to the final analysis, from phase I to drug approval, beyond market access into real world evidence. Our module-based service concept and its flexible data capture and software systems adapt seamlessly to any individual project structure. We had our beginnings in oncology and deepened our knowledge in the various cancer entities ever since. Over the years we grew to 180 employees and expanded our medical expertise to all major indications.

## Highlights

### Driving clinical research into the digital era

Ever since developing Germany's first eCRF, our approach combines clinical trial services with disruptive technologies, aiming to create an impact for patients, physicians and the life science sector.

### AI Data Science

Tackling clinical research's rapid development towards Big Data and transforming the efficiency and data quality of processes, by developing AI-powered software solutions.

### Joining the Huma family

Combining Alcedis' clinical trials expertise and capabilities with Huma's award-winning digital health platform.

## Services

### OUR PASSION IS RESEARCH

- Clinical Operation
- Regulatory
- Monitoring
- Medical Writing
- Data Management
- Pharmacovigilance
- Biometrics
- Sponsor Oversight

### Scientific Consulting

Scientific consulting, early study planning, in depth analysis, feasibility and market evaluation

### Study Case Design

Regulatory proven concepts, study course forecasting and reliable budget planning. Identifying the perfect approach to maximize efficiency and generate the highest data quality

### Study Conduct

Experts join together delivering a full service portfolio, committed to make your study a success.

### OUR DNA IS CODE

- eCRF / EDC
- ePRO / eCOA
- eConsent
- EHR2EDC
- Integrations
- Telemedicine
- AI Solutions
- Analytics

### eCRF

Dynamic data capture in a highly customized and user-friendly environment

### Tech-Ons

Several ready-for-action functionalities developed by best practice

### Integrations

Simple integration of additional data sources and third-party technologies via established interfaces

### Mobile

Consistent data capture and processing via mobile devices at the point of experience
