

COMPANY PROFILE

Dr. Andreas Schemenewitz
Chief Operating Officer
schemenewitz@ihf.de

History and Mission

As a wholly owned subsidiary of the Stiftung Institut für Herzinfarktforschung, a non-profit foundation, we have been managing registry studies, non-interventional studies and randomized clinical trials of phases II, III and IV for more than twenty years. We support research on cardiovascular diseases, risk factors and concomitant diseases. Healthcare research and post-market studies are our key areas, as well as randomized therapy strategy comparisons and disease registries.

Highlights

Experience

- More than 20 years of research experience in Cardiology and other indications
- Healthcare Research
- Post-market studies
- Therapy strategy comparison trials
- Disease registries
- §137e SGB V studies („Erprobungsrichtlinie“)
