History and Mission

kfgn | Site Operations & Services is a specialist, expert partner and experienced provider in clinical trial recruitment and execution. With our six outpatient research sites and specialized study teams we call on more than 25 years of experience in trial conduct. Our structure gives us the flexibility and network we need to cover a broad range of clinical indications. kfgn is part of and German representation of the Pratia International Site Network with a strong European footprint.

Highlights

kfgn offers a full-service covering trial execution and management. We coordinate projects centrally, thus ensuring the research site can focus on trial execution. We take the time for our patients by creating an atmosphere of well-being with positiv impact on compliance, retention and loyalty of our trial participants. 93.5% of our patients would participate another trial at kfgn!
Developing specific approaches for your trial help us to find the patients in the required time and meet our patient goals. At the same time, we do not make any compromises to data quality and patient safety being compliant with all relevant norms and legal regulations.
