History and Mission

The future of clinical trials.
At **Proinnovera** we transform over 25 years of dermatological experience into clinical trial excellence in the field of inflammatory diseases as a full-services CRO. We match our talent and experience with the latest innovative technologies to leverage clinical trial execution. Hands on, efficient, and with one goal; to deliver measurable performance in everything we do and for everyone we work with. Performance for People!

Highlights

Process Oriented

- Our digital process landscape sets the foundation for efficient project management.

Innovative and Adaptive

- Our staff take intensive team ownership. We strive to discover out-of-the-box approaches while using the newest technologies.

Technology Driven

- We maintain high visibility of our activities with a data driven approach. Data in real time. Transforming information resulting in effective oversight.

Result and Service Driven

- Our project team focuses on raising performance to ensure outstanding project execution.
