History and Mission

NUVISAN is the only fully integrated European CRO/ CDMO providing all relevant GxP services from one single source. With a track record of nearly 40 years, we are connecting all services and support along the value chain from late research up to completions of early phase - from the molecule to the patient. Our capabilities are distributed over four locations in Germany and France with a total space of over 25.000 m² and over 400 highly educated employees. **Your Value is Our Business.**

Highlights

Full drug development support services especially for Early Phase Clinical Trials.

NUVISAN Early Clinical Development has strengthened its position as an outstanding drug developer in the early phase. With our non-clinical unit in Grafing, we can integrate in-vitro as well as in vivo DMPK evaluations seamlessly into the drug development process.

NUVISAN's Clinical unit has profound experience in e.g. First-in-Man SAD/MAD studies and Integrated Packages (NCE's and NBE's), pharmacodynamic assessments, PoC, DDI, food effect studies, etc.

NUVISAN Lab Services is one of the leading laboratories to provide bioanalytical, pharmaceutical and Clinical Trial Supply services.

Services

ALL SERVICES BY DIVISION

NON-CLINICAL SERVICES

- In vitro DMPK packages for discovery and development; regulatory DDI
- In vivo DMPK in rodents, dogs or non human primates
- Analytical chemistry, discovery and toxicokinetic
- Isotope labeling, radiosynthesis (¹⁴C, ³H), stable isotopes, reference standards

CLINICAL SERVICES

- **Phase 1 Unit**
- Clinical Conduct in Nuvisan's 140 bed unit
- Data Science Services (Data Management and Bio-Statistics)
- Clinical Project Management
- Regulatory Affairs
- Medical Writing

Clinical Safety Laboratory & Central Lab Services

- Central Laboratory & Biomarker Projects
- In-house Support of Phase-1

LABORATORY SERVICES

- Bioanalytics
- Small Molecules (LC/MS)
- Large Molecules (ELISA, Ligand Binding Assays)
- Cell Culture (Soluble Marker & Cell Surface Marker, Cell Activity)
- Pharmaceutical Analytics (Small & Large Molecules / ELISA, CE, LC/MS, CESI-MS)
- Clinical Trial Supplies (Packaging, Distribution & Manufacturing)

Latin America Phase 1 – 4

- Monitoring Services
