History and Mission

Pharm-Olam is helping biopharma create a healthier world through the research of life-changing treatment. As an award-winning global contract research organization (CRO), we have been on this mission for 25 years, celebrating our 25th anniversary in 2019. In Pharm-Olam, you will find a partner dedicated to your shared vision of helping patients and changing their lives for the better through life-changing treatment.

Highlights

Pharm-Olam operates three Centers of Excellence that were created to offer sponsors distinct benefits unique to their respective therapeutic area of focus. Our three Centers of Excellence are Infectious Disease and Vaccines, Rare Disease and Oncology-Hematology. The Centers of Excellence provide sponsors with a solution driven partner [Pharm-Olam] that combines therapeutically aligned CRO staff, optimized technology, experienced sites and qualified partners (vendors such as laboratory, imaging, etc.) to create true value for sponsors; resulting in increased efficiency and reliability of study execution. Finally, Pharm-Olam's Pattern of Excellence (graphic) is our definitive customer experience for our Sponsors.
