

COMPANY PROFILE

Steffen Spranger, M.D.
Managing Director
Specialist in clinical pathology
clinical.trials@ingolab.de

History and Mission

Founded in 1967, our laboratory is working for physicians and hospitals in a wide area. Since the 1980's we are performing analytical and diagnostic testing for the pharmaceutical industry, since the mid-1990's with customer-oriented full central laboratory service for phase I-IV clinical studies. We are offering cellular analysis and molecular diagnostic studies of samples in the pre-clinical phase according to GLP and quality checks on the manufacture of active ingredients under GMP conditions. Spranger Laboratories are accredited according to directives 93/42/EEC, 90/385/EEC, DIN EN ISO 15189 and DIN EN ISO 17025.

Highlights

A Partial Listing of our Services:

- Project management
- Layout of lab reports according to your requirements
- Medical and technical assistance during preparation and study phases
- Flexible study database
- Creation of laboratory brochures
- Visit-specific blood collection kits
- International logistics
- Archiving and material storage
- Supplying test centres with equipment such as point of care diagnostic devices, centrifuges, refrigerators and the like.

Analyses are conducted by clinical pathologists, microbiologists, chemists, biochemists and biologists who receive regular training on the latest developments in science and technology.

Spranger Laboratories
Lindberghstrasse 9-13
85051 Ingolstadt, Germany

Services

Clinical Chemistry

- High performance chromatography with UV, fluorescence and electrochemical detection
- High performance liquid chromatography tandem mass spectrometry (HPLC-MS/MS)
- Gas chromatography flame ionisation detection (GC-FID)
- Gas chromatography mass spectrometry (GC/MS)
- Atomic absorption spectrometry (AAS)
- Electrospray ionization time-of-flight mass spectrometry (ESI-TOF)
- Chromatographic separation techniques

Haematology

- Blood counts and blood parasite diagnostics
- Biomarker HbA1c and blood sedimentation

Coagulation

- Thromboplastin time (quick), partial thromboplastin time (PTT) and thrombin time (TT)
- All special parameters, including heparin levels in urine

Immunology

- Testing of all relevant humoral hormones, tumor- and biomarkers

Serology

- All special infection parameters, hormonal and biomarker concentrations
- DNA/RNA analysis

Microbiology

- MALDI-TOF, ELISA and PCR
- Susceptibility testing

Hygiene

- Investigations in the fields of hospital, food and water hygiene.

Cell Analytics

- Impressive range of testing methods.
- Flexibility of customer-specific methods for pre-clinical research and research support in advanced phases of clinical drug and medical device trials.

More information and service: please contact us.

- Our portfolio of services is more varied than what is listed. **We will work with you to find a solution.**
