History and Mission

Since more than 25 years the Pharma segment of the business unit **SYNLAB Analytics & Services** offers the pharmaceutical and biotechnology industries as well as manufacturers of medical devices a broad portfolio of analytical methods for preclinical and clinical studies from a single source.

SYNLAB Analytics & Services is part of the SYNLAB group - Europe's largest laboratory service provider for human diagnostics. The SYNLAB group has affiliates in 40 European countries, around 20,000 employees and about 400 laboratories.

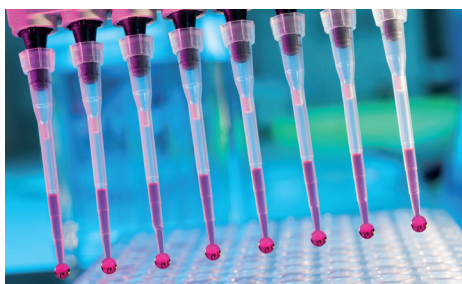

Highlights

SYNLAB A&S supports you from drug discovery to release of the final product and offers you a global logistics network.

Our portfolio at **SYNLAB A&S** includes services for

- pre-clinical / early development
- biologics & small molecules product testing
- development & approval of medical devices
- genomics
- bioanalytical services
- central laboratory
- specialty diagnostics

Take advantage of our extensive expertise gained from supporting more than 3,500 preclinical projects and clinical trials.

SYNLAB Analytics & Services
Germany GmbH, Gubener Str. 39
86156 Augsburg, Germany

Location Munich, Bayerstr. 53
80335 München, Germany

Tel. +49 89 741 39 30
Fax +49 89 741 39 339

BVMA member since 1998
Audits passed in 2000, 2003,
2006, 2009, 2012, 2015 and 2018

Services

GCP, GCLP, GLP & GMP for

- pharma and biotech
- medical devices

Clinical Trial Services

- 24 / 7 lab service for early phase trials
- full analytical spectrum
- genetics and PCR
- microbiology
- histopathology and cytology

Global Central Lab Services

- visit-specific kit building
- extended sample storage
- worldwide shipping logistics
- customized data management

Global Strengths

- one single database
- identical lab reports worldwide
- global quality insurance
- one key contact eases communication

Manufacturing Support Service

- sterility and hygiene testing
- quality monitoring

Customized Analytical Services

- biomarker development
- PBMC preparation network
- assay development
- method validation (EMA / FDA)

Bio-analytical Services

- PK / PD assays
- structure elucidation
- identification of metabolites
- small / large molecules
- bioassays
- cell based assays
- immunogenicity

GMP Analytical Services

- release testing according to Pharmacopeia (EP / USP)
- stability testing according to ICH guidelines
- microbiological testing / bio burden
- leachable & extractable testing
- heavy metal determination to ICH Q3D
- method development and validation for assay and impurity testing
- handling of controlled substances
