History and Mission

Within the consumer health care space, **analyze & realize** is one of the leading consultancy and clinical research providers with a strong focus on natural health products. For over two decades, we have supported our clients with scientific, regulatory and clinical expertise.

With experience, enthusiasm and a robust result-oriented approach, we apply our core competences: the compilation of dossiers for market compliance in Europe and the performance of clinical studies.

Highlights

Clinical Research:

We provide support in the development of highly customized study designs covering a broad range of clinical trial types and indications.

Regulatory Consulting:

a&r provides a unique combination of technical and regulatory expertise in natural health products to support market assessments and the creation of tailor-made innovative solutions.

Strategic Innovation and Consulting:

The Life Science market offers increasing potential for innovative healthcare products tailored to suit certain market needs.

We are
passionate
about the
power of
natural
health
products.
