History and Mission

emovis is known to many as a Dedicated Study Site, but in fact, we have grown to be so much more than that. Since its foundation in 2001 **emovis** has developed into a versatile service provider for clinical trials. Using our team of over 60 employees we offer multiple solutions to support you in the successful implementation of clinical trials. We always embrace the challenge of making the impossible possible, and are dedicated to finding solutions for our clients and clinical trial participants.

Highlights

- All the services we provide offer direct patient contact.
- We have conducted trials in over 120 indications.
- As one of **emovis**' key focuses is on mental health, we have conducted over 50 depression trials.
- We have a very well developed and maintained Quality Assurance System.
- We are constantly developing and are inspired by the changing times and our industry. That's why we established the COVID Trial Unit in 2021, in which we conduct trials with corona positive participants. We operate quickly to find solutions for your project.

emovis GmbH
Wilmerdorfer Str. 79
10629 Berlin, Germany

Services

Study Site

- Phase II–IV outpatient clinical trials in a broad range of indications
- From feasibility to site selection visits, contract negotiation, the site initiation visit, recruitment of study participants, and the execution of the clinical trial – all tasks are completed within strict timeframes.

Sleep Laboratory

- 3 beds in single rooms
- Polysomnographic technology
- Experience in insomnia, depression, Restless Leg Syndrome (RLS) and other indications

Early Phase Unit

- Phases I and Ib clinical trials
- For outpatients and hospitalised patients
- Focus on early phases in psychiatric indications

Patient Access Group

- **emovis** offers effective and efficient patient recruitment for study sites across the DACH region.
- Marketing measures and statistical analysis of the outcome of campaigns are included in our service.
- Follow-up-visits by phone for study participants from all sites in the DACH region

Homecare Visits

- Home visits for study visits from your selected sites in the European Union and the U.K.
- A service that enables certain patient groups, for example those who are immobile or severely ill, to participate in clinical trials.
- The following services can all be performed at home: sample collection, visit documentation, administration of the study drug, documentation of vital signs, review and collection of diaries, completion of questionnaires, and many more.
