History and Mission

Clinical data is our passion!

Whether in interventional phase I-IV studies, non-interventional or medical device studies. Our team is passionate about processing your data in all major therapeutic areas, driven by our dedication to quality, efficiency, and improvement.

Highlights

- Established 1994
- 400+ interventional studies
- 120+ non-interventional studies

As client of an owner-managed SME, you benefit from short decision-making paths, direct communication, and motivated employees. The wealth of experience of our tech-savvy and seasoned employees makes a decisive contribution to the success of your projects.
